Introductions

Next LOINC Lab Committee Meetings (Indianapolis)

Upcoming Meetings
- Wednesday and Thursday June 7-8, 2017
- Wednesday and Thursday December 6-7, 2017
Updates and News (D Vreeman)

LOINC Release

As usual, the RELMA version distributed here is a Limited Release.

Full public release will occur later in December.

Changes to LOINC Table structure

As previously announced, we’ve replaced the “Created On” date with the “VersionFirstReleased”. This field is pairs nicely with the existing field “VersionLastChanged”.

Also, “ValidHL7AttachmentRequest” has been added to support the claims attachments use case.

Highlights of LOINC content changes in this Release

New content additions (S Abhyankar)

• Currently over 1800 new terms
  • About 530+ are lab, 1200+ clinical
  • Edits to 7,000+ existing terms. (Don’t freak, most are radiology)

RELMA highlights

Lots of enhancements to the HIPAA Attachments screen:

• New "Valid Attachment Requests" tab
• Pressing the F1 key anywhere on the page will now take you to a section of the help file that is specific to the HIPAA attachments.

The "Common Tests" search restriction drop down lists on both the mapping and simple search screens now includes a "Clinical Terms Only" option.

Updated translations in beta release

• Chinese (CHINA)
• Italian (ITALY)
• Spanish (SPAIN)

Also expected for official release

Page 2
LOINC Year in Review [HANDOUT]
- Overall growth continues
- New team members, new projects
- Many non-lab content development activities

LOINC Website Re-design (T Briscoe) [DEMO]

Updates from the LOINC Community (Meeting Participants)
